Welcome to your Thinking Journey

1. Discover our rich content library

The platform presents a rich and diverse content library of thinking workouts, videos, ppt's and game-based assessments.

The screenshot displays the Accellium+ platform interface. At the top, there are navigation tabs for 'Thinking Journey' (active), 'Talent Assessment', and 'My Space'. A user profile icon is visible in the top right corner. The main content area features a large heading: 'Take your lectures and workshops to the next level with a diverse and rich game-based workouts'. Below this is a video thumbnail showing a woman presenting to a group of people in a meeting room. Underneath the video is a section titled 'Design Thinking' with a placeholder text: 'Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis semper nibh quis pellentesque ornare. Praesent porta neque eu purus pulvinar egestas. Nullam quis nibh neque. Maecenas rhoncus tincidunt nibh, eu mattis neque facilisis eu.' Below this section is a grid of four interactive cards, each with a game-based assessment thumbnail, a title, a short description, and 'Details' and '+ Add' buttons. The cards are: 1. 'Solving the core of the Problem' (MOVE-IT), 2. 'Solving the Core of the Problem' (Mystery BOX), 3. 'Elimination tool' (ENIGMA), and 4. 'Risk management'. Below the grid is another section titled 'Entrepreneurship' with a similar placeholder text. At the bottom, there is a grid of four more game-based assessment cards: 1. 'Teamwork' (CLASH), 2. 'Identifying Anchors' (Ping Wins), 3. 'Dealing with Changes' (TwoFlags), and 4. 'Paving a Route' (Blocker).

3. Build your own thinking journey

Your journeys can be customized based on the diverse needs of your customers using Accelium Multi Builder. Choose your favorite content and add it to the Journey.

The image displays two overlapping tablet screens. The top screen shows a 'Design Thinking' library with four workshop cards: 'Adapting to change', 'Solving the Core of the Problem', 'Breaking Patterns Tool', and 'Identifying Anchors'. Each card includes a title, a brief description, and a '+ Add' button. A hand cursor is clicking the '+ Add' button on the 'Identifying Anchors' card. The bottom screen shows the 'My Journey' builder interface. It features a header with 'Thinking Journey', 'Talent Assessment', and 'My Space'. Below the header, there are controls for 'My Journey' (a search field, a checked 'Include profile page' checkbox, and 'Submit Journey' and 'Delete Journey' buttons). The main area shows a sequence of five steps: 1. 'Identifying Anchors' (with a start date of 1.12.2022 and end date of 31.1.2023), 2. 'Breaking Patterns Tool' (with 'Start date' and 'End date' set to 'Define'), 3. 'Paving a Route' (with 'Start date' and 'End date' set to 'Define'), 4. 'Identifying Anchors' (with a start date of 6.9.2023 and end date of 19.11.2024), and 5. '+ Add a workout'. Each step is represented by a circular icon with a red 'X' in the top right corner. Below the sequence, there are five empty circular slots, each with a '+' sign, indicating where new workouts can be added.

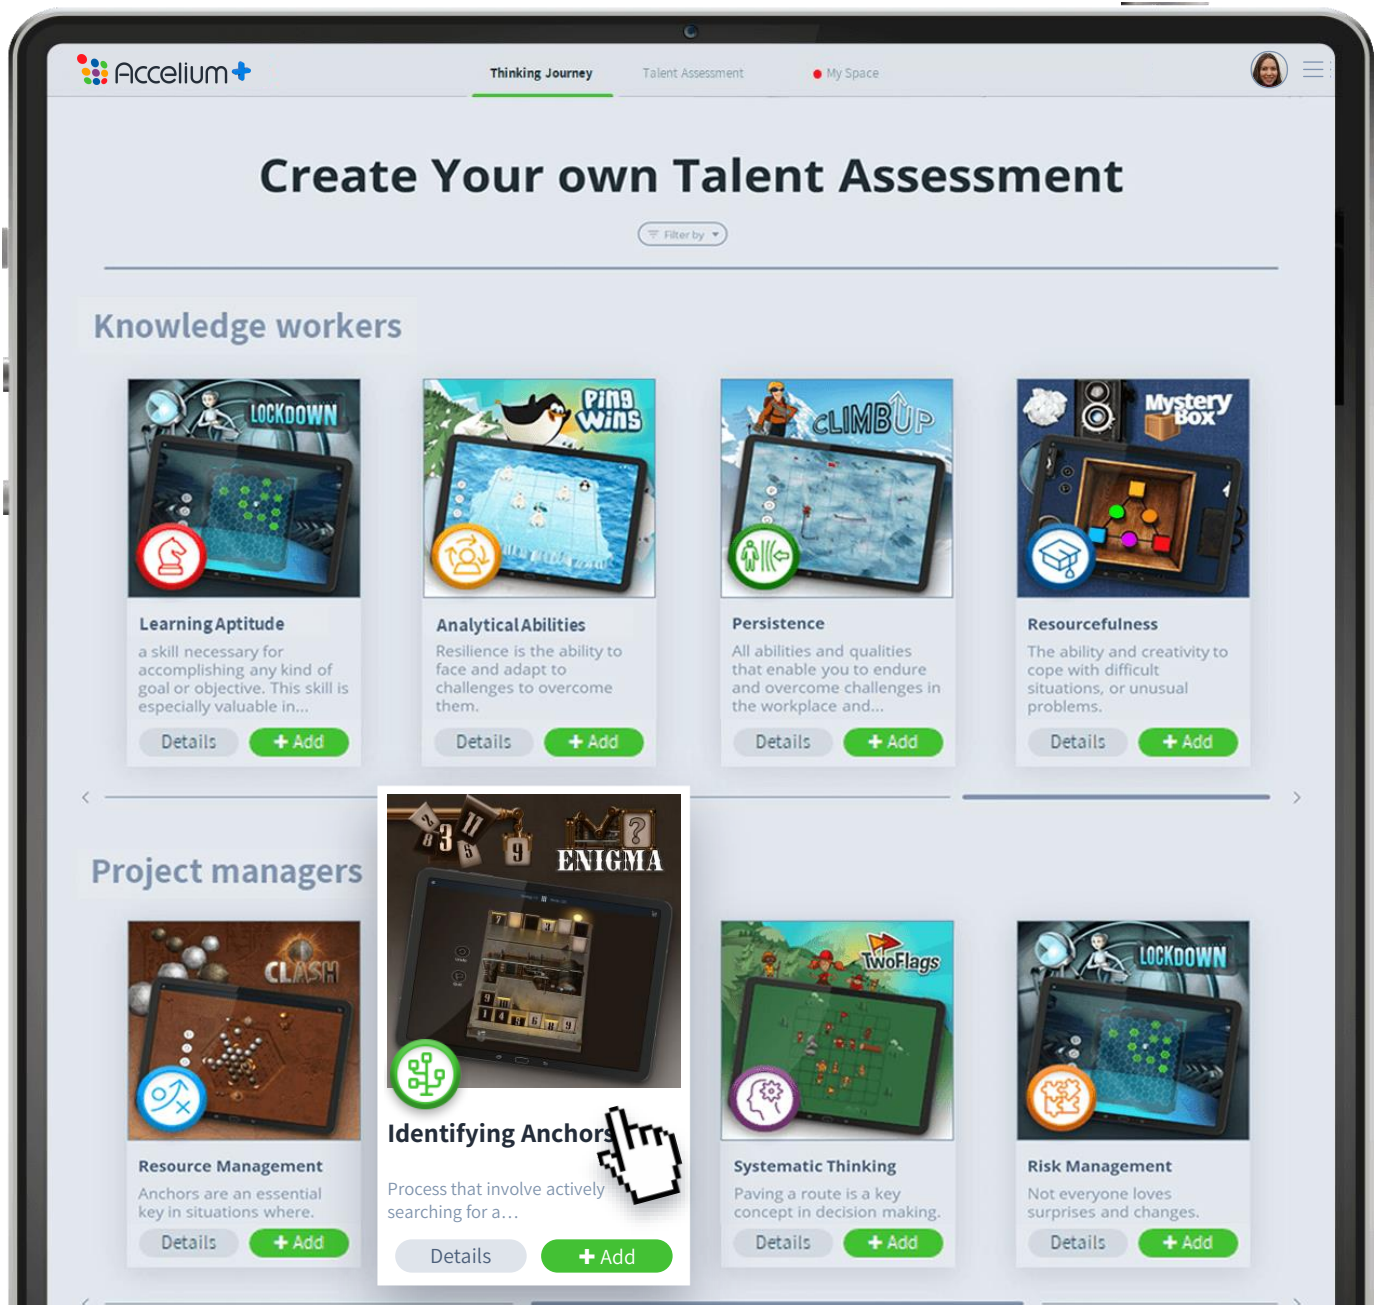

4. Add your unique content

Build your own gallery of materials and use them to create diverse and unique Thinking Journeys. Adding videos, images and presentations can support your groups learning process.

5. Discover our new Talent test library

Assessment library consists of "mini" tests which can be used to assess candidates for job-specific skills. Skills such as Resourcefulness, Initiative, and Organization, as well as more general abilities like critical thinking.

6. Customize Assessment Tests

Use the "mini" tests to create a unique assessment based on a variety of skills of your choice. The assessment builder help you customize tests for different roles in the organization.

Your Insights

Analytical Ability
Analytical Ability allows us to examine several possible courses of action, to assess their outcomes, and to help us choose the best one. A high level of analytical ability is demonstrated in the games by finding optimal solutions and avoiding unneeded moves. Your analytical ability score is high (87), which indicates you were very accurate while solving the game challenges throughout the test. It seems that you are analytic and level-headed: You think and act in a systematic, calculated, and precise manner. It seems like you are the one to turn to with analytical problems or with tasks that require analyzing information and drawing conclusions. Whenever accuracy is critical, when there is a need to prepare a plan and to calculate the results and implications of each action, we expect you to work well and suggest the best solutions.

Learning Aptitude
Efficiency is the ability to do things well, successfully, and without waste (of time or other resources). Your efficiency is evaluated by your ability to solve as many levels as possible, as accurate and as fast as possible. The more levels you successfully solve or win, the higher the score you get. Your efficiency score is high (94), which indicates you worked efficiently throughout the test. It seems like you hardly skip or give up any task, you usually meet their goals, and do it as fast and as efficient as you can. Do you agree? In some situations, being efficient is more important than getting the most accurate result. For example: when your time is limited or when other resources are limited; When different needs are conflicting with each other, and you

Self-improvement tips and suggestions

Understand your employer's expectations
Make sure you understand your company's culture, your cultural 'fit' with the organization and your working relationship with your supervisor or manager are very important. Make sure you are familiar with the values of the company so that you can demonstrate them effectively.

Have a positive attitude
Whether things are going well or badly, always maintain a balanced viewpoint and resist the urge to complain to co-workers about your boss or your job. Your complaints could work their way up to those higher in the organization. Instead, find the right channels to suggest improvements.

Be a team player
Those willing to set aside their personal goals for the overall goals of the department or company are valued by organizations. Team players get noticed and often advance faster than those with a more self-centered approach.

Willingness to take on extra duties
Whether it's overseeing a major new project or offering to learn a new system, always volunteer for extra responsibilities. This may be a given, but people who excel in their workplace often go above and beyond of what they're asked to do.

Learn more about the skills

What is planning?
Planning ability is the ability to examine ways of action in advance and choose the most efficient way. Planning in advance requires investing time in examining the moves, not acting by trial and error and reducing the range of mistakes.

What is dealing with pressure?
The ability to neutralize the effect of time pressure on the thinking process. Dealing well with time pressure takes into account the time we have available to carry out the task but does not cause it to paralyze us or divert us from diagnoses between the main.

What is Complex Problem Solving?
The ability to arrive at a solution or decision logically. The process of drawing conclusions is a systematic thinking process based on progress, step by step, based on clear facts and assumptions.

What is Quick Thinking?
The ability to process the data of a challenge or situation quickly and act quickly. An ability that allows you to react quickly and reach high power in a short time.

What is flexibility?
The ability to perform various tasks well, successfully and without wasting time or other resources. Effective thinking balances well between the quality of the solution and the speed of the solution.

What is strategic thinking?
A broad vision, one that does not focus only on concrete steps but tries to understand the big picture. A situation analysis process whose purpose is to outline a course of action and principles of action that will advance us to achieve the goal.

What is efficiency?
The ability to perform various tasks well, successfully and without wasting time or other resources. Effective thinking balances well between the quality of the solution and the speed of the solution.

What is Persistence?
The ability to stick to a task for a long time and not give up on completing it. Perseverance is manifested in the face of particularly difficult challenges in which we are required to maintain optimism and demonstrate resilience.

8. Everything you need is now in one place!

A dedicated category for 'training materials' is available in the system for presentations, videos and learning maps, as well as additional resources. Game based learning and assessment materials will be located in one place

9. Get full control on managing your courses

The course management interface provides a comprehensive overview of the status of all your courses as well as access to the Data Center and advanced editing tools.
